

I like to design and build!

What careers are there for me in the NHS?

Some of our faves!

Medical engineer

Someone who checks medical equipment to make sure it is working correctly before it gets used!

Re-constructive scientist

Someone using prosthetics to reconstruct parts of a persons body (usually in the face).

Rehabilitation engineer

Someone who designs artificial body parts, measures walking characteristics, improves the function of artificial limbs, and surgical corrections of deformities.

What do the people in those careers think of it?

//
My role as an engineer isn't just about fixing equipment. I am also involved in training staff on how to use kit, so, I could be working with any one from surgeons to physiotherapists to nurses and lab technicians. You have to be a good problem solver to do my job.
- Medical Engineer

How do I get into the field?

A-levels

Or BTEC in at least 1 science and design & technology

University

1st or 2:1 at degree level in a related subject

Scientist training programme

GCSE's

5 GCSE's level 4-9

Practitioner training programme

On a course related to the job
